Talking Medicines

NLP Expert

The opportunity

Talking Medicines is looking for an NLP Expert.

Our vision is to create the world's leading source of patient insights, organised by medicine.

As a product-led growth business, we are enjoying fast-growth both in the UK and the US with the rollout of PatientMetRx, our AI-powered data service for Pharmaceutical companies.

We listen and engage with patients, capture their global digital voice respecting extensive compliance requirements, and provide curated actionable intelligence to our pharmaceutical clients. We believe that the patient should be at the centre of healthcare and aim to use real-world data for good.

We strive to offer a supportive, trusting and transparent environment where challenges are embraced, and achievements celebrated! You will not be bored nor micro-managed and will be given plenty of opportunities to learn new technologies and skills.

We embrace diversity and equal opportunity and are committed to building a team that represents a variety of backgrounds and perspectives.

The role

As an NLP Expert in the development team, you will:

- Improve NLP-based capabilities, including named entity recognition and identification, topic analysis, sentiment analysis, and much more!
- Employ machine learning techniques as well as rule-based systems
- Be involved in the whole development process, from design to implementation, testing and launch
- Work day-to-day as part of the cross-functional Product Development team

You will report to the COO of Talking Medicines until the Head of Engineering joins the team.

About you

We are looking for a naturally motivated, experienced NLP expert with knowledge of:

- NLP techniques including computational linguistics, statistical NLP, modelling, machine learning, rule-based systems (5+ years across academia and commercial, but at least 3 years commercially)
- Identifying the best practice for named entity recognition, topic analysis, sentiment analysis (etc) on large volumes of social media data
- Cloud computing on Azure, SQL databases, agile software development

- Business analytics packages (Power BI, Mix Panel, Apps Flyer)
- Working as part of a remote or distributed development team

You should have a track record of designing and launching successful software solutions. As a bonus, familiarity with digital health would be beneficial.

Package

Location: Glasgow City-Centre with flexible working
Salary: £40K-£70K depending on experience
Holidays: 33 days (25 days holiday and 8 statutory bank holidays)
Training: Individual budget for personal development

If you would like to join our innovative and dynamic team, then please get in touch today and share your CV. Please contact us at careers@talkingmedicines.com. Let us know if you have any questions at all.
