

## Frontend Developer

### The opportunity

Our vision is to create 'EVA', the world's leading source of patient insights, organised by medicine.

We believe that the patient should be at the centre of healthcare. We listen and engage with patients, capture their global digital voice with extensive compliance requirements, in order to provide curated digital insights to our pharmaceutical clients, to support their patient-centric marketing decisions, thus driving more effective medicines. We use real-world data for good.

We are now looking for a **Frontend Developer** with a keen interest in data science. We are a pretty small, dynamic team offering a supportive, trusting and transparent environment. You won't be bored nor micro-managed! We enjoy challenges and a fast pace and are proud of our achievements. Your personal growth matters to us and you will be given plenty of opportunities to learn new technologies, practices and techniques. You will have a lot of room to grow!

We embrace diversity and equal opportunity and are committed to building a team that represents a variety of backgrounds and perspectives.

### The role

As a Frontend Developer in the EVA development team, you will:

- Develop the EVA web-based user interface
- Be involved in the whole development process, from design to implementation, testing and launch
- Liaise with the Designer to contribute to original designs and look-and-feel guidelines, and ensure that the final product is in line with these
- Collaborate with backend engineers, NLP experts and Data scientists to integrate their APIs and data
- Work day-to-day with the whole development team, including the Product Manager and Product Owner

You will report directly to the Talking Medicines Head of Engineering.

### About you

We are looking for a naturally motivated, experienced frontend developer with expertise in:

- Web development (7+ years), with a record of developing and launching successful web applications
- Frontend development using JavaScript and a range of frameworks (e.g. React, Vue.js)
- Agile software development, continuous integration (CI/CD) on Azure, test-driven development

- Working as part of a remote or distributed development team

As a bonus, familiarity with digital health would be beneficial.

### **Package**

Location: Glasgow City-Centre with flexible working

Salary: £50K-£80K depending on experience

Holidays: 33 days (25 days holiday and 8 statutory bank holidays)

Training: Individual budget for personal development

If you would like to join our innovative and dynamic team, then please get in touch today and share your CV. Please contact us at [careers@talkingmedicines.com](mailto:careers@talkingmedicines.com). Let us know if you have any questions at all.
